PROFESSIONAL SUMMARY

Cybersecurity student with practical lab experience in phishing investigation, security alert triage, and Splunk log analysis. Uses email evidence, URL reputation checks, and firewall and proxy logs to assess suspicious activity and document findings. Seeking a cybersecurity internship or Junior SOC Analyst opportunity.

EDUCATION

Undergraduate Technology Degree in Cybersecurity | UNOPAR
2026 - Present | Distance learning

SECURITY PROJECTS

SOC Alert Triage and Investigation | TryHackMe labs

- Investigated simulated alerts in Splunk and reviewed firewall and proxy logs to establish event context and check for related activity.
- Examined suspicious senders and URLs, checked reputation data, and assessed whether logs showed access to malicious links.
- Classified alerts as true or false positives and documented supporting evidence, related entities, and recommended response actions.

github.com/Miguelvq04/soc-alert-triage-investigation

Phishing Email Investigation | TryHackMe Greenholt Phish lab

- Reviewed suspicious email metadata and attachment details to identify phishing indicators.
- Documented the investigation with screenshots and explanations of the evidence used to reach a conclusion.

TECHNICAL SKILLS

Security operations: Alert triage, phishing analysis, indicators of compromise, true and false positive assessment, investigation documentation.

Tools and logs: Splunk SIEM in lab environments, firewall and proxy log analysis, URL reputation checks.

Networking and systems: TCP/IP, DNS, HTTP/HTTPS, common ports and protocols, Windows and Linux fundamentals.

Programming: Python fundamentals; basic SQL and SQLite through academic projects.

TRAINING

TryHackMe | SEC0 and SEC1 - Completed
TryHackMe | SOC Level 1 learning path - In progress
Google Cybersecurity Professional Certificate | In progress
